

Aquaresistcrete™

Mix with the Best

Do it “Watertight” the first time

Aquaresiscrete™

Mix with the Best

Aquaresiscrete™ is an exclusive waterproofing concrete offered by RMC Readymix (India), that is suitable for basements, swimming pools, lift pits and many other structures that require effective waterproofing. Concrete, as strong as it may be, cannot stop water from seeping through it and forming cracks and over time, deterioration.

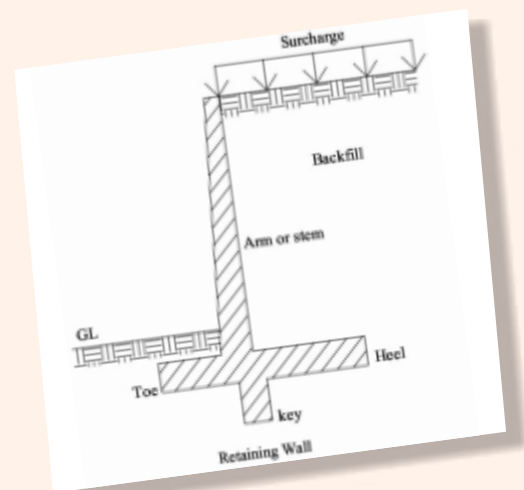

Aquaresiscrete™ contains specially formulated admixture that reacts with moisture in the fresh concrete and by-products of cement hydration, to cause a catalytic reaction. The process generates a non soluble crystalline formation throughout the pores and capillary tracts of the concrete, making it Water Tight.

7 key advantages:

1. Keeps water out, or in as required.
2. Waterproofing and Chemical resistance properties remain intact even if the surface is damaged.
3. Effective against hydrostatic pressure.
4. Enhanced durability and long term performance.
5. Reduced risk of reinforcement corrosion.
6. Non Toxic.
7. Cost effective solution.

Applications:

- Basement Retaining Walls.
- Lift Pits.
- Swimming pools.
- Water retaining structures.
- Sewage and water treatment plants.
- Tunnels & Subways.
- Reservoirs.
- Bridges.
- Foundations.
