

# Dyecrete<sup>TM</sup>

Mix with the Best

Promises to stay always

colourful

Dyecrete™ from RMC Readymix (India) is flexible & easy to gel with any creative ideas & concepts. It incorporates excellent quality UV resistant pigments sourced from reputed manufacturers, which aid in retaining the true colour/shades for a long duration. To supplement this benefit, various textures can also be integrated on the concrete surface when laid as a ground slab.

Normal concrete made with grey cement cannot provide the liberty to architects to explore their vision and bring variety in the treatment of various elements of a building.

### 5 key advantages:

1. Aesthetic, rich & multicolored designs.
2. Infinite options can be explored by the Architects as per their vision and imagination.
3. Easily available and low on maintenance costs.
4. Smart colour options with durable surface.
5. Easy & fast installation.

### Applications:

- Pathways for buildings such as malls, IT parks, hotels, hospitals, factories, etc.
- Concrete floorings for parking areas, basements, etc.
- Artistic precast panels and products.
- Walkways in entertainment parks and gardens.
